Sometimes what hurts isn't physical

Your mental and emotional wellbeing affects every aspect of your life, from personal relationships and your physical health to your ability to do your job. Here are some signs you could use a little extra support even if you don't have a diagnosed condition.

6 signs you could benefit from emotional health support

1 Changes in sleep or eating habits
A notable increase or decrease in appetite and disrupted sleep patterns can be red flags.

2 Unexplained physical ailments
These can include headaches, upset stomach, and general aches and pains.

3 Chronic fatigue and a lack of energy
Everyone gets run-down, but it's not normal to feel that way for weeks or months.

4 Shunning social activity
Personal connections are crucial to good mental health, even if visits are virtual.

5 Growing stress caused by daily activities
This can take many forms, from an inability to cope with problems to simply feeling overwhelmed.

6 Substance abuse
Overdrinking or using drugs is a common sign of more serious underlying issues.

If you need help finding an affirming and supportive health care or mental health provider, our care managers are here to help.

Call 1-877-222-1240 (TTY 711) Monday – Friday, 8 a.m. - 5 p.m.

Knowing where to go when you need mental or emotional help is the first step toward improving your mental health.
